

Find Equation Given Slope and One Point

Slope =  (, )

$$Y = \text{} \cdot X + b$$

$$\text{} = \left(\text{} \cdot \text{} \right) + b$$

$$\text{} - \left(\text{} \cdot \text{} \right) = b$$

$$\underline{\hspace{2cm}} = b$$

Equation: $Y = \text{} X + \underline{\hspace{2cm}}$
