

Solving Absolute Value Equations:

Step 2: Create two equations from $| \bigcirc X + \square | = \text{(Expression)}$

Equation #1 $\underline{\quad} X + \underline{\quad} = (\underline{\quad})$

Equation #2 $-(\underline{\quad} X + \underline{\quad}) = (\underline{\quad})$

$-\underline{\quad} X - \underline{\quad} = (\underline{\quad})$

Solve both linear equations for the values of X. For further assistance, see scaffolds for “Solving A Linear Equation”.
