## GBF Reading Expectations:

### Moving From Inspectional To Analytical

Of course you can read, but are you *thinking critically*?

*Analytical reading* hones your ability to evaluate evidence and sources, synthesize information, judge claims, understand motivations, interpret literary devices, and draw your own conclusions. It will help you enjoy reading more, and is essential to becoming a critical thinker.

To reach your full potential in school now and in your future professional careers, you must become an *analytical reader*. Your Global Business & Finance courses integrate three tools to help you meet these reading expectations – *silent sustained reading periods*, *annotation guides*, and *commonplace books*. Embrace these tools as part of your daily study routine and you will achieve better results with less effort.
